Wishvanath Sah

Lead Full Stack Engineer | React.js | Node.js | TypeScript | AI-Assisted Engineering

Hyderabad, India | +91 9939940266 | wishvanath.sah.career@gmail.com

Portfolio: wishvanathofficial.github.io/career-portfolio | LinkedIn: linkedin.com/in/wishvanath-sah-career

PROFESSIONAL SUMMARY

Lead Full Stack Engineer with 8+ years of experience designing, developing and delivering scalable enterprise web applications across Healthcare, HR Technology, Cybersecurity, Analytics, Sports, Blockchain and GIS domains. Currently at CitiusTech, leading end-to-end feature delivery and guiding a team of 8–10 engineers. Strong expertise in React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs and modern web architectures, with a focus on reusable component ecosystems, code quality and performance. Collaborates with Product, QA, Architects and Engineering stakeholders in Agile environments, and applies AI-assisted engineering (GitHub Copilot, ChatGPT, Claude, OpenAI Codex) to improve productivity and software quality.

KEY ACHIEVEMENTS

- Led feature delivery for an enterprise healthcare learning platform used by nurses and clinicians, working with a team of 8–10 engineers, QA and product stakeholders across multiple releases.
- Built a reusable React component library that cut new-screen development effort by ~35% and standardised UI, accessibility and cross-browser behaviour across modules.
- Improved page load and API response times by 30–40% through code-splitting, query optimisation and caching.
- Introduced AI-assisted development workflows that saved an estimated 4–6 hours per developer per sprint on refactoring, debugging and documentation.

CORE TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, SASS

Backend & Database: Node.js, Express.js, REST API Development, API Integration, Sequelize ORM, MySQL, PostgreSQL

Cloud, DevOps & Version Control: AWS, AWS CodePipeline, Jenkins, Octopus Deploy, Heroku, CI/CD, Git, GitHub, GitLab

UI & Design Systems: Material UI, Bootstrap, Element UI, Semantic UI, Figma, Responsive Design, Cross-Browser Development

Collaboration & Delivery: Agile/Scrum, Sprint Planning, Technical Estimation, Code Reviews, Jira, ServiceNow, Slack

AI-Assisted Engineering: GitHub Copilot, ChatGPT, Claude, OpenAI Codex, Agentic AI Workflows, AI Agent Creation, Prompt Engineering

PROFESSIONAL EXPERIENCE

Lead Engineer – II | Full Stack Engineer

Aug 2022 – Present

CitiusTech, Hyderabad

- Lead end-to-end development of enterprise healthcare applications, including the Clinical Learning Hub, across frontend and backend layers, coordinating a team of 8–10 engineers and QA.
- Translate business and functional requirements into maintainable, production-ready applications, owning design, implementation, testing support and release for each feature.
- Architected reusable React.js components and responsive workflows, reducing new-screen development time by ~35% and ensuring consistent UI, accessibility and cross-browser behaviour.
- Developed Node.js/Express RESTful APIs and MySQL/PostgreSQL queries; optimised slow endpoints and queries, improving response times by ~30–40%.
- Participate in architecture discussions, technical estimation, implementation planning and release activities; run code reviews and mentor junior developers.
- Collaborate closely with Product Managers, QA teams, Architects and Engineering stakeholders on decisions affecting maintainability and scalability.
- Drive code quality through debugging, refactoring, peer reviews and engineering best practices, working with QA to resolve defects early and keep releases stable.
- Use GitHub Copilot, ChatGPT, Claude and OpenAI Codex to accelerate development, troubleshooting and documentation, saving an estimated 4–6 hours per developer per sprint.

Key Technologies: *React.js, TypeScript, Node.js, Express.js, MySQL, AWS, GitHub Copilot, Claude, AI-Assisted Coding*

Full Stack Engineer

Nov 2020 – Aug 2022

AxiomIO

- Developed full-stack web applications using React.js, Angular, Node.js and REST APIs for client-facing products in HR technology, cybersecurity, fintech analytics, sports and blockchain domains.

- Created reusable UI components supporting responsive desktop, tablet and mobile experiences, speeding up delivery of new client features by ~25%.
- Implemented frontend business logic, form workflows, validations and API integrations; adapted features to client-specific requirements and user journeys.
- Collaborated with UX designers and QA teams to deliver high-quality software; took part in sprint planning, requirement analysis, testing, defect fixing, deployment and maintenance.

Key Technologies: *React.js, Angular, Node.js, REST APIs, JavaScript, TypeScript*

Full Stack Engineer **May 2018 – Nov 2020**

SkyMap Global

- Developed GIS and satellite-imagery web applications using React.js and Angular, including Crop Scout, Farm Vigil, Sahyog and monitoring dashboards.
- Built reusable application components and responsive, cross-browser interfaces optimised for desktop, tablet and mobile for enterprise users.
- Integrated HTTP/REST services and implemented business workflows from client requirements and functional specifications.
- Contributed to functional analysis, test scenarios and test cases, defect resolution and continuous product enhancement with the engineering team.

Key Technologies: *React.js, JavaScript, REST APIs, GIS Platforms*

KEY PROJECTS & DOMAIN EXPERIENCE

Clinical Learning Hub — Healthcare | CitiusTech
Centralised learning platform supporting nurses and clinicians through responsive workflows, reusable component architecture and REST API integrations, with continuous product enhancement.

Skillfully — HR Technology | AxiomIO
Skills-based hiring and employment platform featuring candidate workflows, dashboards, reusable UI components and API integrations.

OFOFO — Cybersecurity Marketplace | AxiomIO
Marketplace where sellers publish cybersecurity offerings and buyers discover, purchase and track services.

Paygilant — Analytics & Fraud Insights | AxiomIO
Performance Insights Dashboard supporting fraud monitoring, operational insights, trend identification and high-risk activity analysis.

Australian Premier League — Sports Platform | AxiomIO
Web platform supporting football league operations, management workflows and user interactions.

XCHANGE MONSTER — Blockchain | AxiomIO
Blockchain/cryptocurrency platform supporting trading workflows and low-latency, transaction-oriented experiences.

SkyMap GIS Solutions — Agriculture / GIS | SkyMap Global
Agricultural monitoring platforms including Crop Scout, Farm Vigil and Sahyog, built on GIS and satellite-imagery workflows.

LEADERSHIP & ENGINEERING HIGHLIGHTS

- Technical ownership from requirements gathering through deployment and release; backend API design and system integration.
- Component-driven architecture and reusable UI development to improve consistency and maintainability.
- Agile delivery, sprint execution and cross-functional collaboration with Product, QA, Design and Engineering teams.
- Code reviews, refactoring, debugging and software quality improvements; adoption of AI-powered engineering practices.

CERTIFICATIONS & TRAINING

- Professional Training – Agentic AI [add issuer, year]
- Practitioner Certificate – Codex and ChatGPT [add issuer, year]
- NPTEL – Cloud Computing; NPTEL – Modern Application Development

EDUCATION

Master of Computer Applications (MCA) – Pondicherry University (School of Engg. & Tech.) | CGPA 9.08 **2015 – 2018**

Bachelor of Computer Applications (BCA) – T.N.B. College, Bhagalpur | 69% **2014**
